PROFESSIONAL WIRELESS HEADSET SYSTEM

PLANTRONICS

# Savi™ Talk

The Savi Talk wireless headset system provides the best in class solution for office desk phone communications. It provides all the benefits of wireless mobility in a sleek, easy to use, well-built design. As the next generation wireless headset solution that delivers superior sound quality, long talk time, mobility with wireless range and a convertible wearing style, Savi Talk makes you more productive, more comfortable, and more accessible.

Savi™ Talk WT100/T

## WORK SMARTER

**Freedom to move:** On a long conference call? Savi Talk features an extended range up to 50M, allowing you to roam away from your desk and talk hands free while staying fully connected.

**Business-critical sound quality :** 2.4 GHz support for superb sound quality, enhanced long boom design to optimize transmit sound quality and a noise-canceling microphone filters distracting background noise from your conversations.

**Ease of use:** Dramatically easier to install and use by providing simplified design.

**Pack your Savi Talk headset:** Savi Talk allows telecommuters to take advantage of any Savi Talk base installed in another office. A Savi Talk user, when traveling, can carry his/her own Savi Talk headset and reconnect to a different Savi Talk base in a different location

**Energy efficient for longer working hours :** An adaptive power system maximizes battery life by sensing proximity to the base system and dialing the power up or down as needed. This reduces overall energy consumption, extends battery life and gives you more time to talk.

## Savi™ Talk Key Features

**Operating Frequency** 2.4 GHz

**Wearing Styles** Convertible (over the ear or over the head)
